DETAILED ACTION

Election/Restrictions

- 1. Applicant's election without traverse of group II, claims 15-41 in the reply filed on 08/11/05 is acknowledged. The elected claims are the subject of further restriction as follows.
- 2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 15-17, drawn to a base station with a decoder, classified in class 455, subclass 456.5.
 - II. Claims 18-41, drawn to a remote station with a decoder, classified in class 455, subclass 456.6.
- 3. The inventions are distinct, each from the other because of the following reasons:

Inventions I-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a base station comprising a transmitter for transmitting to the remote station a negative acknowledgement command. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

During a telephone conversation with Won Tae Chris Kim on 10/12/05 a provisional election was made without traverse to prosecute the invention of claims 18-41. Affirmation of this election must be made by applicant in replying to this Office action. Claims 15-17 are

Art Unit: 2681

withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 18-41 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 9 of copending Application No. 10/646,242. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claim in 10/646,242 anticipates the claim of the instant invention.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Application/Control Number: 10/646,955

Art Unit: 2681

5. Claim 18 is rejected under 35 U.S.C. 102(b) as being anticipated by Jamal (US 5,754,537).

Regarding claim 18, Jamal teaches a remote station, comprising: a data buffer for receiving data for transmission (col. 10, lines 31-34); a message generator for generating an access request message when the data buffer contains data for transmission (col. 11, lines 51-53); a receiver for receiving one or more individual grant channels and one or more common grant channels from a base station (see fig. 6); a message decoder for decoding an access grant directed to the remote station, the access grant comprising an individual grant directed on one of the one or more individual grant channels or a common grant on one of the one or more common grant channels (col. 14, lines 33-36, the claimed common grant channels are shared channels which are inherent in the access grant); and a transmitter for transmitting the access request message and for transmitting a portion of data from the data buffer in response to a decoded access grant (col. 11, lines 32-34, col. 11, lines 57-63).

Allowable Subject Matter

6. Claims 19-41 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Q. Nguyen whose telephone number is 571-272-7844. The examiner can normally be reached on 8:30AM-5:30PM.

Application/Control Number: 10/646,955

Art Unit: 2681
